

SUFFERED EIGHT YEARS RESTORED BY PERUNA.

MRS. MARY S. FENNESSEY.

AS MANY THOUSAND PEOPLE SUFFER FROM CATARRH OF HEAD IN SHOULD CREATE GREAT PUBLIC INTEREST. WINTER, MRS. FENNESSEY'S PERMANENT RECOVERY

Mrs. Mary S. Fennessey, Lake Benton, Minnesota, writes: "I was afflicted with a bad case of catarrh in the head, and was unable to breathe through my nose for eight years. Six bottles of Peruna cured me entirely and I have not been bothered with catarrh since."

A Helpless Invalid.

Mrs. Annie Spain, Gainesville, Arkansas, writes: "I was helpless in bed for eight months, and part of the time would not have weighed over sixty pounds. Food would do me no good. I had catarrh of the head and stomach and internal catarrh, and also had heart trouble so bad I could not bear any one to talk in the room where I was. The doctors and everybody that saw me said I would not get well. But God saw fit to spare me and sent relief through your wonderful medicine, Peruna."

Best Remedy for Women.

Miss Harriet F. Kimbro, care Fisk University, Nashville, Tenn., writes: "I am pleased to state that Peruna has proven of great value to me. I often found that my duties proved too much for my strength, and if it were not for Peruna I couldn't continue to do my work. It is a splendid tonic, invigorator and the best remedy I know of for women to take. It acts quickly in ridding the system of a cold and catarrhal afflictions."

JAPAN'S FIRST NATIVE KNIGHT OF THE FILM

Had a Hard Time Learning Process and a Harder Time Getting Sitters.

Renzo Shimooka, who is now 33 years of age and whose residence is in Asakusa Park, Tokyo, was the first Japanese to learn the art of photography. When he was a student of painting, when a youth fifty years or more ago, he saw photographs for the first time and at once made up his mind to introduce this to him marvelous western art into Japan.

He found the introduction decidedly difficult, according to the Oriental Economic Review, as the Japanese of those days believed photography to be a sort of witchery practised by Christian people. Confiding his plans to his master, Shimooka became an employee in the fort at Fraga with the hope of being able to learn photographic processes from some accidental or other whom he might meet when the foreign men-of-war touched there.

Day after day he watched patiently for the coming of what were known as the "black ships," telescope in hand, and it came about in the end that he was able to learn a little photography. As soon as Yokohama became an open port Shimooka put up his photographic sign on Benten-dori avenue.

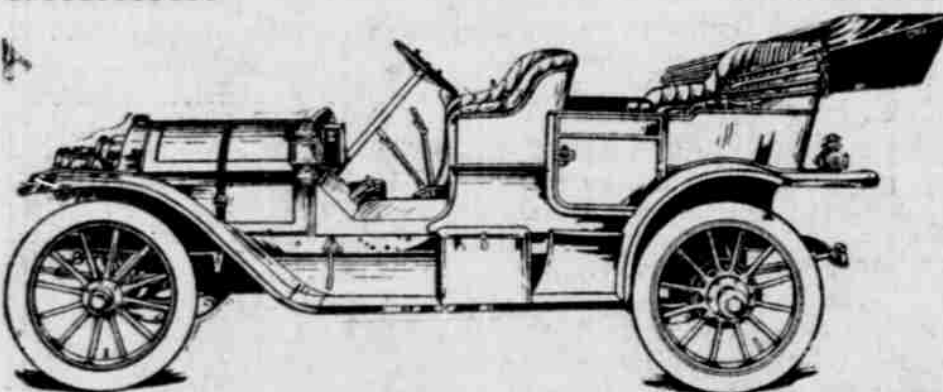

But no Japanese could be persuaded to come to his studio, for the current notion as to photo taking was that the life of the subject was shortened, as photography extracted a part of the human oil or essence of human existence. The only customers this pioneer photographer had for a long time were the sailors of foreign vessels who thought that being photographed by a Japanese would be an interesting experience.

These are not mere claims, they are established QUALITIES that will be demonstrated to your complete satisfaction.

We have one of the latest model fore-door cars in stock and would be pleased to demonstrate at your convenience.

ST. JOSEPH'S ANNEX DEDICATED TUESDAY

Twenty-two Rooms Added to a Well-Known Phoenix Institution.

The new annex of St. Joseph's hospital was dedicated last Tuesday afternoon at 1:30 by Bishop Granjon of Tucson. The service was private and was attended only by visiting clergy and Sisters, of whom a number came from Phoenix to be present at the ceremony.

Rev. Father Severin, pastor of St. Mary's church of this city, attended the bishop, with Father Rowen of Evansville, Father Kohlman of Prescott, Father Clinton of St. Mary's parish, and two Spanish missionaries from San Antonio. The Sisters of the Catholic hospitals at Prescott and Nogales were also present with the Sisters of St. Joseph's. Bishop Granjon returned to Tucson the morning after the dedication.

The new hospital annex is a splendid and improved building in the pure Mission style of architecture, and may be safely pronounced the finest and most perfectly appointed hospital building in the Southwest. The front facade is made particularly striking by the nine well proportioned arches which give an immediate impression of solidity and strength to the beholders, and this impression is repeated when the interior of the building is examined, for its design is consistent throughout.

There are two stories in the structure, with 22 rooms, all either with, or connecting with model and sanitary bathrooms, of which there are eighteen. No sanitary feature which could be incorporated into a hospital has been overlooked. On each floor there is a public bath, with shower and portable tub on rollers, which can be filled and wheeled to the patients' rooms. The floors are hardwood throughout the entire building.

The east and west sides have porches along the entire length of the building, and every room opens directly out upon a porch. This is a feature which will be appreciated by the patients. A hot water system has been installed in the basement, where the sisters' and nurses' dining rooms are also located. This hot water system will furnish heat for the operating rooms and halls of the old hospital as well as for the annex. There is a treatment room and a diet kitchen on each floor, all these rooms being as complete in their equipment as could be desired. Six rooms of the new annex are already furnished in a very substantial and serviceable manner, each room having a dressing and a bedside table, a comfortable rocker and a brass bedstead. The Sisters of the institution have announced the date of which will be used for furnishing the remainder of the rooms. The date has not been definitely decided upon as yet.

On the first floor there is a large parlor, or living room, already furnished in a very elegant style, where visitors can be entertained, and these rooms, which are bright and sunny, will no doubt prove to be a popular lounging place for convalescing patients.

The new St. Joseph's annex is another addition to the rapidly growing list of substantial and beautiful buildings of which the city will always be proud, and the erection of a well equipped hospital fills a long felt need of the citizens of Phoenix.

A scald, burn, or severe cut heals slowly if neglected. The family that keeps a bottle of BALLARD'S SNOW LINIMENT on hand is always prepared for such accidents. Price 25c. 50c and \$1.00 per bottle. Sold by E. V. Hulet, quality druggists.

JONES SALOON LICENSE WITHSTOOD FIRST ATTACK

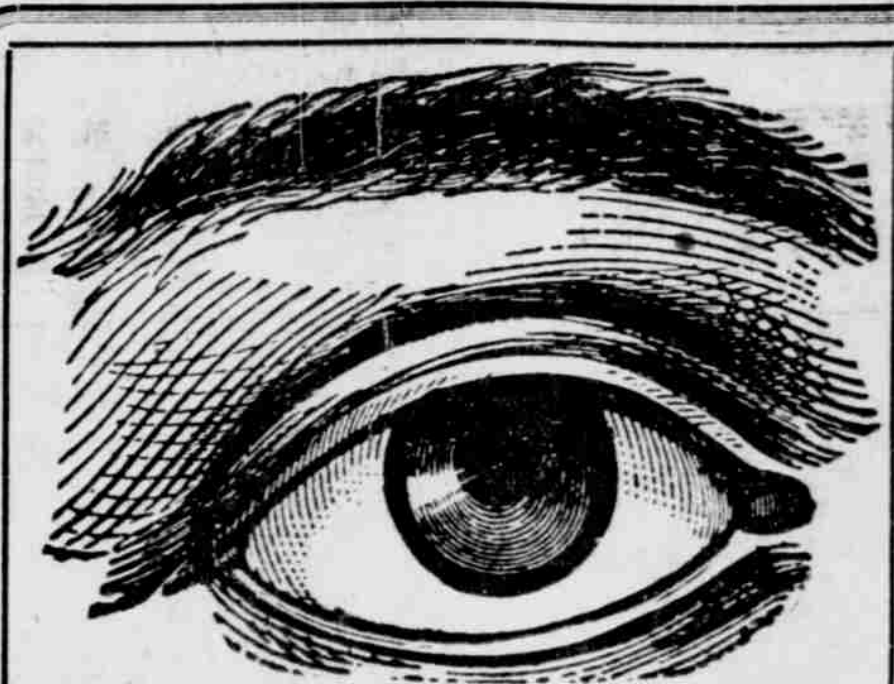

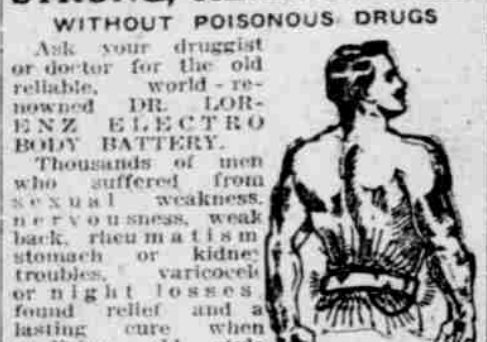

Demurrer Against Complaint in Certiorari Proceedings Sustained.

It was found necessary to take a new start in the case of J. L. Irvin against the board of supervisors, the sheriff and L. A. Jones, license granted to Jones last September by the board of supervisors. This was an application for a writ of certiorari. It was the contention of the plaintiff that on account of the work going on at the Center street bridge at the time of the issuance of the warrant the issuance was a violation of the six-mile limit law.

STRONG, HEALTHY MEN WITHOUT POISONOUS DRUGS

Ask your druggist or doctor for the old reliable, well-known DR. LORENZ ELECTRO-BIOLOGICAL BATTERY.

Thousands of men who suffered from sexual weakness, nervousness, weak back, rheumatism, stomach or kidney troubles, varicocele, or night losses found relief and lasting cure when medicine, old style electric belt, or other appliances failed. It preserves health and prolongs life; saves doctor's fees. The mild, yet powerful, life-giving electric current goes direct to the weakened organs, muscles and nerves, in a steady, soothing form, restoring the system to normal health and strength; requires no charging, always ready for use; strongest and best at any cost. Your opportunity now to get one at the same price doctors pay; \$5.00 up, no further expense; lasts a lifetime. Book with full particulars and lowest factory prices by mail, sealed, free. LORENZ ELECTRIC WORKS, Desk B, 2240 Lincoln Ave., Chicago, Ill.

glasses are the genuine "invisible" bifocals. The "near" and "far" lenses are one solid glass. No "lines," no cement. Kryptoks are the "real thing" in bifocals.

Ask to see Them. They cost a little more than the old style, but they are the best.

NOTE

WE believe in advertising, knowing so many people are in need of our services. We own and maintain one of the leading optical houses in the United States at Denver, Colo., and have also built up a wonderful business here during the eight years we have been located in Phoenix. This end has only been achieved by honest endeavor on our part and by giving our patrons the very best service that is to be had anywhere.

Eye Care Is Our Specialty.

Devoted exclusively to examination of the eyes, the fitting and manufacturing of glasses.

THOUSANDS SUFFER WITH EYE TROUBLES

Who attribute the cause to something else. Headaches, Nervousness, Painful, Sore, Inflamed, Burning, Smarting, Itching, Floating Spots, Cloudiness of Vision, Watery or Discharging Eyes, Granulated Eyelids, can all be THE RESULT OF EYE-STRAIN.

Why suffer when relief can be easily obtained? Delay means worse conditions. Thousands of satisfied patrons in Arizona are wearing our Glasses. We have given them satisfaction. Is there any reason why we should not do the same by you? DON'T BUY CHEAP GLASSES. If you could buy real eyes, which would you buy—cheap ones, or the best that money could purchase? Our prices are reasonable, and a GUARANTEE OF ABSOLUTE SATISFACTION GOES WITH ALL OUR WORK.

SWIGERT BROS. OPTICAL COMPANY

Established Eight Years in Phoenix. Bring your broken lenses and frames to be repaired or duplicated. Our Prices are Standard and will suit you. Office Hours: 9 to 12, 1 to 5. Other times by appointment. 17 EAST ADAMS ST. Phones: Cons., Red 2641; Overland, 641. DR. L. M. SWIGERT, Mgr. Across from New Adams Hotel.

OUR TORIC LENSE

They appeal to everyone. Has enlarged field of vision. Can be set close to the eyes. The line of vision passes through at right angles to its surface, which is very important. Has many other features.

Ordinary Flat Lens

Note the difference in the field of vision on Toric.

When the matter came up for hearing before Judge Kent yesterday morning the defense demurred on various grounds. First, there was a general demurrer on the ground that no cause of action was set forth in the petition; on the further ground that the allegations of the plaintiff who had come into the case was a taxpayer were based on information and belief, and on this ground the demurrer was sustained and the plaintiff was given permission to amend his complaint.

Another ground for demurrer attacks the certiorari plan directly. It is contended by the defense that the issuance of the license was not a judicial proceeding and is therefore not subject to review.

There was another case against the defendant Jones in Judge Parker's court, in which he was charged with selling liquor without a license, but in that case a demurrer was also sustained.

EXPLORATION OF THE CASA GRANDE VALLEY

Harry Welch and Julius Padilla Bring Photographs Back From the Wilds.

Having explored the uttermost wilds of the Casa Grande valley, even to Adamsville and the Casa Grande ruins, Secretary Harry Welch of the board of trade and Julius Padilla, Southern Pacific photographer, returned to Phoenix late Friday evening. They declare that the valley is destined in time to be an inland empire, even as the Salt River valley is now.

Welch and Padilla hoped to make the trip in one day, but the train which they took to Florence was delayed and it was after noon before they reached that place. They decided to make it a two-day trip and so remained in Florence over night. During the afternoon they inspected the penitentiary, had a long talk with District Attorney J. J. O'Connor of Pinal county and also called upon Editor Thomas F. Weed of the Florence Blade. By evening one in Florence they were received very cordially. Among other things they learned that 3,500 acres in the vicinity of Florence were cultivated last year, but that this year the acreage will be increased to 5,000. The farmers have lately completed a new canal at a total cost of \$25,000 and assured a most dependable water supply. Florence is still dreaming, however, of a diversion dam at San Carlos. Editor Weed also informed the visitors that 500 homesteads had been taken up in the valley during the last year, the homesteaders hoping to get water from the San Carlos dam when it is completed, or by pumping if it is not built.

Early Friday morning Welch and Padilla took a rig and started across the country toward Casa Grande. They saw a great deal of land that had been cleared off, ready for irrigation and cultivation as soon as water is available. Little houses were seen here and there, many vacant. A stop of some little time was made at Adamsville, three or four miles from the Casa Grande ruins. Adamsville was one of the most promising of Arizona's early settlements and at one time was scheduled to be the capital of Arizona. Now it is nothing but ruins. Mr. Padilla took a number of photographs. Though he spoiled the effect of the landscape, Welch insisted on being in some of the photographs in order that he could show them

If anyone asked him to produce his Eskimos. Since his Grand Canyon trip Welch has been very careful about bringing back proofs whenever he goes upon an exploring expedition.

At Casa Grande the explorers were received by Frank Pinkley, the man in charge of the ruins. After a pleasant stay, during which Padilla took some more photographs, they started back to Florence and arrived in time to catch the late train to Phoenix.

EVERYBODY DOESN'T KNOW WHY THE WIND BLOWS

The wind, like other things of everyday life, rarely invites notice, unless it is unusually "high," and rarely do we hear the questions, "Why does the wind blow?" "Why doesn't the wind blow?" "What is this wind that rushes 'out of the nowhere into the here'?" Why should it blow at all, or why sometimes so gently and at other times with the resistless force of the hurricane?

The wind could have no power, it could not even exist, if the air had no weight, this weight having been shown to be about 31 grains for each 100 cubic inches of air, says the March St. Nicholas. When air is put in motion the effect is like that obtained by throwing a ball against an object. The harder you throw the ball the harder it will strike, and the greater the number of balls thrown at one time the greater will be the force of the blow. When the wind is blowing, it strikes what it blows against, and the harder it blows (that is, the greater the speed of the air) the harder it will strike against the resisting object.

What causes the wind to blow or why the air should be in motion is not easy to explain. Simply stated, it is caused by the tendency of hot air to rise, and thus to form a partial vacuum into which the cooler surrounding air rushes

in much the same way as water will rush downward to seek its level. If the earth were smooth, if it did not rotate, and if there were no sun, the air would be motionless. When the sun shines on a wide space of the earth, the air of that region becomes heated, this great volume of warm air rises, and the cooler, heavier, surrounding air flows in to take its place. As the earth rotates, there tends to be formed a ring of heated and rising air with currents flowing at the bottom and at both sides. This is the condition that prevails near the equator and causes the trade winds that blow so steadily. The rotation of the earth causes the wind south of the equator to flow toward the north, and this line to flow toward the southwest.

ATHLETICS AS A DRINK CURE.

In England Football Has Caused a Desertion of Saloons.

It has long been an athletic truism that drink and play do not go well together. It is not so well known, however, nor so generally believed that there is a logical conflict between alcohol and looking on at games. That this is true seems to be borne out, however, by the testimony of recent observers in England. The little island is football mad and the frenzy is increasing to the great perturbation of the cricket enthusiasts. Thousands crowd to see the

games every Saturday during the season. As a consequence the public houses are deserted.

A few years ago the workers flocked to the bar when their work was done, and left the publican perhaps ten or fifteen shillings of their weekly wages of twenty-five or thirty; now they spend a single shilling or less for a sight of a good game of football. This is not to say that they do not find their way to the public house after the game, but the afternoon is gone and suppertime is drawing near.

Football seems to be an effective answer in England to the oft repeated question of the ecologists of the sabbon, "What shall the workingman do with his leisure time?" In this country baseball serves the same purpose for six months of the year—Outing Magazine.

SOUTHERN 'CONE PONE.

The real southern pone contains no milk, and it is made of white corn meal as follows: To one quart of sifted white meal add one teaspoon of salt, and pour on enough cold water to make a soft dough; work it until the water and meal are thoroughly mixed, mold into oblong cakes about one and one-half inches thick in the middle, put them on a hot pan on which has been sprinkled some of the bran sifted from the meal, and bake in a hot oven about twenty minutes.

Have You Money to Invest in First Mortgages on Class "A" Ranches in Alfalfa?

I can place at once the following amounts: \$2,000, \$2,500, \$4,000, \$5,000, \$9,000 and \$14,000. In each case the land is worth at least twice the amount of loan. Interest is eight per cent. I recommend these securities as being high grade and perfectly safe in every respect. I have had twenty years experience in dealing with Real Estate Mortgages. I refer by permission to Phoenix National Bank as to my responsibility.

E. A. MARSHALL
Rooms 2 and 3, Lewis Building. No. 7 West Adams Street.

EASIEST TERMS IN THE VALLEY

We offer a 25-acre ranch, all in wheat, three miles from Phoenix P. O. at \$130 per acre. There is an extra fine stand of grain on this, which properly handled will pay back to the buyer, the entire first payment we ask. It's all rich fertile soil, class "A" water, good roads, shade, etc. Special inducements to a man with a family who will take this place and build on it at once.

Dwight B. Heard
